

Technical Memo No. 114

02-006 Glass Edge Fin Seal (Clear PVC) – 260 System

Optional Seal

This new clip-on PVC fin seal is an easy way to improve the air infiltration performance of the Lidco Frameless Sliding Window (260 System).

The seal is simply cut to the required length and clipped onto the edge of the glass. The clear PVC seal is unobtrusive and fits securely without the need for any fasteners.

For extra sealing performance both panes of glass can be fitted with the seal.

Designed to accept 6mm or 6.38mm glass only.

Optional clip-on clear PVC fin seal
